-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-7 and 9-16 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Ullman (U.S. 6,685,600). As broadly claimed, Ullman discloses an upright member adapted for positioning on a horizontal surface, a support assembly secured to the upright member, an arcuate guide means mounted in an upper portion of the support assembly, a pair of handhold means (46) having axes of rotation spaced at a selected distance from each other, each handhold means comprising an upper end pivotably mounted and detachably repositionable (as best understood) and means for adjusting resistance to movement of the handhold means when the distance between the axes of rotation is decreased by a user. Examiner notes that Applicant has not claimed a pair of *rigid* downwardly extending arms and handhold means. With regards to claims 2-5 and 11-16 are drawn to limitations that are a function of how the user is positioned during exercise. Ullman discloses a device that allows the user to perform exercises which will result in the limitations regarding position to be met. As best

Art Unit: 3764

understood, Ullman discloses an arcuate plate carrying a means for securing upper ends of the handhold means to the guide means. Ullman discloses the means for adjusting resistance comprising a weight stack. Ullman further discloses a flexible connecting member (cable) extending between the gear assembly and weight means.

Allowable Subject Matter

3. Claims 8 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
